

Importance of Using CPT II Codes

We're asking our providers to make sure to use accurate CPT Category II codes to improve efficiencies in closing patient care gaps and in data collection for performance measurement. When you verify that you performed quality procedures and closed care gaps, you're confirming that you have given the best of quality care to our members.

WellCare made a change to CPT II code payment to assist in the pursuit of quality. It's a win-win situation!

Effective January 1, 2019, WellCare added CPT II and HCPCS codes to the fee schedule at a price of \$0.01.

This allows billing of these important codes without a denial for "non-payable code."

<p>What Are CPT Category II Codes?</p>	<p>CPT Category II codes are tracking codes that close care gaps and facilitate data collection for the purpose of quality performance measurement. CPT Category II codes are comprised of four digits followed by the letter "F".</p>
<p>Why Bill CPT Category II Codes?</p>	<p>Billing CPT Category II codes reduces the burden of chart review for a select group of HEDIS® performance measures.</p>
<p>How to Bill CPT Category II Codes?</p>	<p>CPT Category II codes are billed in the procedure code field the same as CPT I codes. CPT II codes describe clinical components, usually evaluation, management or clinical services, and are not associated with a relative value. (CPT II codes are billed with a \$0 billable charge amount.)</p>
